

Bringing the forefront benefits of IT to mining sites

Many mines operate around the clock.

Our top priority is to minimize machine downtime for maximum productivity.

To this end, we deliver IT benefits, as we support our customers around the world.

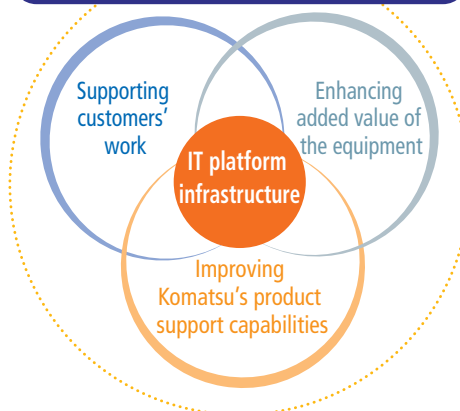

Autonomous haulage system

Downloading data from the controller of the Vehicle Health Monitoring System (VHMS), mounted on the equipment

IT Applications to Equipment and Services

Analyzing VHMS data on a notebook PC in his office

The DISPATCH mine management system developed by Modular Mining Systems, Inc., a wholly owned subsidiary in the U.S.
