# **BUCKET CAPACITY**

0.66–1.57 yd<sup>3</sup> 0.50–1.20 m<sup>3</sup>

# **CONVENTIONAL PERFORMANCE IN A TIGHT TAIL BODY**

Heavy counterweight mass provides equal or better lift capacity than most conventional excavators in the same size class. Rounded cab profile with a sliding door, allows the cab to swing within the same swing radius as the counterweight for true tight tail performance.

A powerful Komatsu SAA6D107E-3 engine provides a net output of 123 kW 165 HP. This engine is EPA Tier 4 Final emissions certified.

Variable Geometry Turbocharger improves engine response and provides optimum air flow under all speed and load conditions.

Komatsu Diesel Particulate Filter (KDPF) and Selective Catalytic Reduction (SCR) system reduces particulate matter and NOx, while providing automatic regeneration that does not interfere with daily operation.

Komatsu Auto Idle Shutdown helps reduce nonproductive engine idle time and reduces operating costs.

Komatsu's Closed-Center Load Sensing System (CLSS) provides quick response and smooth operation to maximize productivity.

**Enhanced working modes** are designed to match engine speed, pump delivery, and system pressure to the application.

Temperature controlled fan clutch helps improve fuel efficiency and lower sound levels.

#### Large LCD color monitor panel:

- 7" high resolution screen
- · Provides "Ecology-Guidance" for fuel efficient operation
- Enhanced attachment control

### Aux jack and (2) 12V outlets

### **Rearview monitoring system (standard)**

Equipment Management Monitoring System (EMMS) continuously monitors machine operation and vital systems to identify machine issues and assist with troubleshooting.

### **Enhanced working environment**

- Integrated ROPS cab design (ISO 12117-2)
- Cab meets ISO Level 1 Operator Protective Guard (OPG) top guard (ISO 10262)

Wide access service doors provide easy access for ground level maintenance.

### Komatsu designed and manufactured components

New engine and hydraulic control technology improves operational efficiency and increases productivity up to four percent.

**Operator identification system** can track machine performance for up to 100 operators.

Handrails (standard) provide convenient access to the upper structure.

**Battery disconnect switch** allows a technician to disconnect the power supply before servicing the machine.

The **KOMTRAX**<sup>®</sup> telematics system is standard on Komatsu equipment with no subscription fees for the life of the machine. Using the latest wireless technology, **KOMTRAX**<sup>®</sup> transmits valuable information, such as location, utilization, and maintenance records to a PC or smartphone app. Custom machine reports are provided for identifying machine efficiency and operating trends. **KOMTRAX**<sup>®</sup> also provides advanced machine troubleshooting capabilities by continuously monitoring machine health.

# **PERFORMANCE FEATURES**

# KOMATSU NEW ENGINE TECHNOLOGIES

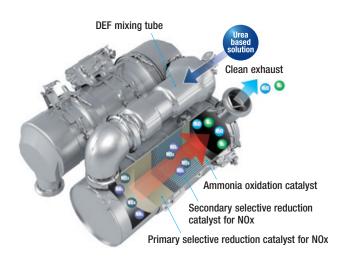

# Komatsu's New Emission Regulations-compliant Engine

New regulations effective in 2014 require the reduction of NOx emissions to one tenth or below from the preceding regulations. In addition to refining the Tier 4 Interim technologies, Komatsu has developed a new Selective Catalytic Reduction (SCR) device in-house.

# **Technologies Applied to New Engine**

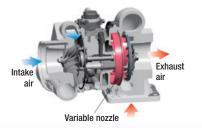

# Heavy-duty aftertreatment system

This new system combines a Komatsu Diesel Particulate Filter (KDPF) and SCR. The SCR NOx reduction system injects the correct amount of Diesel Exhaust Fluid (DEF) at the proper rate, thereby decomposing NOx into non-toxic water ( $H_2O$ ) and nitrogen gas ( $N_2$ ).

# Variable Geometry Turbocharger (VGT) system

The VGT system features Komatsu design hydraulic technology for variable control of air-flow and supplies optimal air according to load conditions. The upgraded version realizes better exhaust temperature management.

The system recirculates a portion of exhaust gas into air intake and lowers combustion temperatures to reduce NOx emissions. Furthermore, while EGR gas flow is increased, by incorporating a high-efficiency and compactly designed cooling system, the system achieves a dynamic reduction of NOx, while helping reduce fuel consumption.

CG image

# Advanced Electronic control system

1 KDPF

2 SCR

3 KCCV

4 Cooled EGR

6 VGT

The electronic control system performs high-speed processing of all signals from sensors installed in the machine providing total control of equipment in all operating conditions of use. Engine condition information is displayed via an onboard network to the monitor inside the cab, providing necessary information to the operator. Additionally, managing the information via KOMTRAX helps customers keep up with required maintenance.

# High Pressure Common Rail (HPCR) fuel injection system

High pressure fuel injection with computerized control attains close-to-complete combustion, reducing Particulate Matter (PM) emissions. While this technology is already used in current engines, the new system uses a higher-pressure injection, thereby reducing both PM emissions and fuel consumption at all engine load conditions.

# **Enhanced Productivity**

The PC238USLC-11's P mode provides improved performance in demanding applications.

**Productivity** 

Compared to the PC228USLC-10 in P mode

Up to **4%** increase

# P mode (90° swing truck loading)

# Large Digging Force

With the one-touch Power Max function, digging force has been further increased. (8.5 seconds of operation)

### Maximum arm crowd force (ISO):

| 101 kN (10.3 t) 🗭                   | <b>108 kN (11.0 t) 7 % UP</b> (With Power Max.) |  |
|-------------------------------------|---|--|
| Maximum bucket digging force (ISO): |   |  |
| 138 kN (14.1 t) 📫                   | <b>149 kN</b> (15.2 t) <b>8 % u</b> P           |  |

(With Power Max.)

Measured with Power Max function, 2925 mm arm and ISO 6015 rating

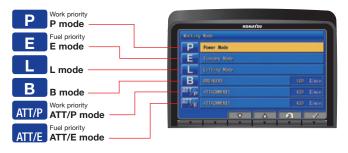

# **Efficient Hydraulic System**

The PC238USLC-11 uses a Closed-Center Load Sensing System (CLSS) that improves fuel efficiency and provides quick response to the operator's demands. The control system matches engine and hydraulic demand at the most efficient point under any load condition. There have also been improvements in the main valve and hydraulic circuit to reduce hydraulic loss, resulting in higher efficiency and lower fuel consumption.

# **Working Mode Selection**

The PC238USLC-11 excavator is equipped with six working modes (P, E, L, B, ATT/P and ATT/E). Each mode is designed to match engine speed, pump flow, and system pressure to the application. The PC238USLC-11 features an attachment mode (ATT/E) that allows operators to run attachments while in Economy mode.

| Working<br>Mode | Application                   | Advantage   |
|-----------------|-------------------------------|---|
| Р               | Power mode                    | <ul> <li>Maximum production/power</li> <li>Fast cycle times</li> </ul>                  |
| E               | Economy<br>mode               | •Good cycle times<br>•Better fuel economy   |
| L               | Lifting mode                  | <ul> <li>Increases hydraulic pressure</li> </ul>  |

# **Arm Quick Return Valve**

When the arm is extended, the quick return valve directs additional oil through a second line directly back to tank which reduces back pressure. Reduces fuel consumption and improves efficiency.

# **PERFORMANCE FEATURES**

# Komatsu Auto Idle Shutdown

Komatsu auto idle shutdown automatically shuts the engine down after idling for a set period of time to reduce unnecessary fuel consumption and exhaust emissions. The countdown to engine shutdown can be easily programmed from five to 60 minutes.

# **Fine Controllability**

Proportional Pilot Controls (PPC) allow the operator finite control and feedback with minimal effort for comfort and efficiency.

# **Stable Platform**

The PC238USLC-11's compact 6.7 mt **14,815 lb** counterweight provides exceptional lifting capacity and minimizes rear swing radius for operation in confined areas.

### Pattern Change Valve (Standard)

A pattern change valve is conveniently located at the front of the machine, making switching from excavator controls to backhoe controls quick and easy.

# PC238USLC-11

# **OPERATION FEATURES**

# SHORT SWING RADIUS

# Ideal for Confined Applications

The PC238USLC-11 is an ideal machine for applications such as road work, underground utilities or other applications where a conventional excavator will not fit. The contoured cab design and convex sliding door allow the cab to swing within the same radius as the counterweight. Trucks can be positioned closer to the machine when working within one lane of traffic, improving operator confidence and job efficiency.

# Short Implement Swing Radius

A higher boom raise angle than a standard excavator reduces the minimum front implement swing radius down to 2310 mm 7'7". The result is greater front swing clearance when space is limited.

# **Short Tail Swing Radius**

220 mm

1810 mm 5'11" short tail swing radius of the PC238USLC-11 allows the machine to work in more confined areas than a conventional machine.

# **Greater Working Ranges**

Raising the boom on the PC238USLC-11 to a greater angle enhances overall working performance. Job sites that require a taller upper reach, such as demolition and slope cutting, also benefit from the increased digging and dumping ranges of the PC238USLC-11.

# Working range

Max. digging height 10700 mm 35' 1"

Max. digging depth 6620 mm 21' 9"

Max. digging reach 9875 mm 32' 5"

# **OPERATION FEATURES**

# **ROPS CAB STRUCTURE**

# ROPS Cab (ISO 12117-2)

The machine is equipped with a ROPS cab that conforms to ISO 12117-2 for excavators as standard equipment. The ROPS cab has high shock absorption performance, featuring excellent durability and impact strength. It also satisfies the requirements for Level 1 Operator Protective Guard (OPG) and top guard (ISO 10262).

# **Rear View Monitoring System**

An updated rear view monitoring system display has a camera image that is continuosly displayed together with the gauges and important vehicle information. This enables the operator to carry out work while easily checking the surrounding area.

# Low Vibration with Viscous Cab Mounts

The PC238USLC-11 uses viscous mounts for the cab that incorporate a longer stroke and the addition of a spring. The cab damper mounting combined with a high rigidity deck reduces vibration at the operator's seat.

# General Features

# Lock lever

- Seat belt, retractable Tempered and tinted glass
- Large mirrors
- Slip-resistant plates
- Thermal and fan guards
- Pump/engine compartment partition
- Travel alarm
- Large cab entrance step
- Handrails
- Sliding door

Secondary engine shut down switch at base of seat to shutdown the engine.

# **WORKING ENVIRONMENT**

# **Comfortable Working Space**

# Large cab with wide front view and foot space

A large operator cab with rounded corner provides an overall cab size similar to a standard excavator cab even though this machine has an extra small swing radius. A sliding door enables easy access especially in confined work areas. Additional operator comfort is provided with a fully adjustable suspension seat.

# Automatic Air Conditioner

The automatic air conditioner allows the operator to easily and precisely set the cab atmosphere using the large LCD color monitor panel. The bi-level control function improves air flow and keeps the inside of the cab comfortable throughout the year.

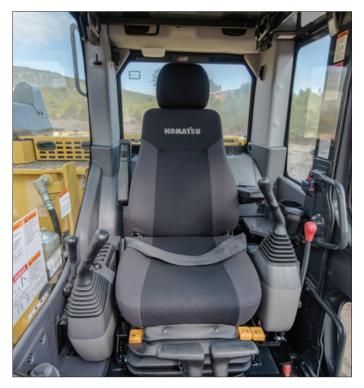

Cab light

Defroster

Opening & closing skylight

(conforms to the ISO standard)

# Auxiliary input jack

Connecting an auxiliary device such as an MP3 player to the auxiliary input enables the operator to hear through the stereo speakers installed in the cab.

Automatic air conditioner (A/C)

### Pull-up front window

Remote intermittent wiper with windshield washer

# Standard Equipment

Windshield glass with excellent UV filtering

# Support Efficiency Improvement

# **Ecology guidance**

While the machine is operating, ecology guidance information can be displayed on the monitor screen to provide fuel saving advice in real time.

# Ecology gauge & fuel consumption gauge

The monitor screen includes an ecology gauge and a fuel

consumption gauge which is displayed continuously. The operator can set a target value.

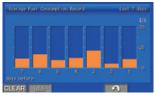

Ecology gauge Fuel consumption gauge Ecology guidance

# Operation records, fuel consumption history, and Ecology guidance records

The ecology guidance menu enables the operator to check the operation records, fuel consumption history and ecology guidance records.

Operation record

Fuel consumption history

# KomVision (Optional)

An optional three camera system provides a bird's eye view (including cab visibility) of the machine and surrounding area. This system improves operation and situational awareness on the jobsite

KomVision benefits operators working in urban environments, confined spaces, and high traffic jobsites from increased visibility and situational awareness.

Distance markers are displayed in the monitor to show machine tail swing radius.

# **MAINTENANCE FEATURES**

# Standard high-efficiency fuel filter and fuel pre-filter with water separator

A high-efficiency fuel filter and a pre-filter with water separator increase reliability. The fuel pre-filter is also equipped with a priming pump.

Fuel pre-filter (With water separator) — High efficiency fuel filter —

# Easy access to engine oil filter, engine main fuel filter and fuel drain valve

Engine oil filter, engine main fuel filter and fuel drain valve are remote mounted to improve accessibility.

Fuel drain valve

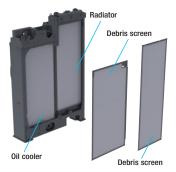

Engine oil filter

# Fan belt auto-tensioner

For free maintenance of fan belt tension adjustment.

# Side-by-side cooling

Since radiator, aftercooler and oil cooler are arranged in parallel, it is easy to clean, remove and install them. Radiator, aftercooler, and oil cooler made of aluminum have high cooling efficiency and are easily recycled.

# A/C filter

The A/C filter is removed and installed without the use of tools, facilitating filter maintenance.

# Washable cab floor mat

The PC238USLC-11's floor is easy to keep clean. The gently inclined surface has a flanged floor mat and drainage holes to facilitate run off.

# **DEF** tank

The DEF tank is installed on the right front platform for easy access. The DEF tank includes a sight glass and fold down shelf to support a DEF container during filling. A separated pump also provides excellent serviceability.

# Long-life oil, filter

| Engine oil & engine oil filter | every 500 hours  |
|--------------------------------|------------------|
| Hydraulic oil                  | every 5000 hours |
| Hydraulic oil filter           | every 1000 hours |

# Battery disconnect switch

A standard battery disconnect switch allows a technician to disconnect the power supply and lock out before servicing the machine.

# PC238USLC-11

# Supports the DEF level and refill timing

The DEF level gauge is displayed continuously on the right side of the monitor screen. In addition, when the refill timing\* is reached, the DEF low level guidance appears as a pop-up display to inform the operator in real time.

\* In Tier 4 Final emissions certified, the engine output must be restricted at shortage of DEF.

DEF low level guidance DEF level gauge

# "Maintenance time caution lamp" display

When the remaining time to maintenance becomes less than 30 hours\*, the maintenance time monitor

appears. Pressing the F6 key switches the monitor to the maintenance screen.

\* The setting can be changed within the range between 10 and 200 hours.

### Aftertreatment devices regeneration automatic display

When it is necessary to carry out manual regeneration (The manual stationary regeneration) of the KDPF, the display automatically switches to the aftertreatment device regeneration screen to inform the operator.

# **KOMATSU PARTS & SERVICE SUPPORT**

# **KOMATSU CARE**

# **Program Includes:**

\*The PC238USLC-11 comes standard with complimentary factory scheduled maintenance for the first 3 Years or 2,000 Hours, whichever occurs first.

# **Planned Maintenance Intervals at:**

500/1000/1500/2000 hour intervals. (250 hr. initial interval for some products) Complimentary Maintenance Interval includes: Replacement of Oils & Fluid Filters with genuine Komatsu Parts, 50-Point inspection, Komatsu Oil & Wear Analysis Sampling (KOWA) / Travel & Mileage (distance set by distributor; additional charges may apply)

# **Benefits of Using Komatsu CARE**

- Assurance of Proper Maintenance with OEM Parts & Service
- Increased Uptime & Efficiency
- Factory Certified Technicians Performing Work
- Cost of Ownership Savings
- Transferable Upon Resale

# **Complimentary KDPF exchange**

The PC238USLC-11 comes standard with one complimentary Komatsu Diesel Particulate Filter (KDPF) exchange unit for the first five years or 4,500 hours, whichever occurs first. End user must have an authorized Komatsu distributor perform the removal and installation of the KDPF.

# Complimentary SCR system maintenance

The PC238USLC-11 also includes one factory-suggested service of the selective catalytic reduction (SCR) and diesel exhaust fluid (DEF) system during the first five years or 4,500 hours, whichever occurs first. End user must have an authorized Komatsu distributor perform the SCR maintenance.

# Komatsu CARE® – Extended Coverage

- Extended Coverage can provide peace of mind by protecting customers from unplanned expenses that effect cash flow
- Purchasing extended coverage locks-in the cost of covered parts and labor for the coverage period and helps turn these into fixed costs

# Komatsu Parts Support

- 24/7/365 to fulfill your parts needs
- 9 parts Distribution Centers strategically located across the U.S. and Canada
- Distributor network of more than 300 locations across U.S. and Canada to serve you
- Online part ordering through Komatsu eParts
- Remanufactured components with same-as-new warranties at a significant cost reduction

# Komatsu Oil and Wear Analysis (KOWA)

- KOWA detects fuel dilution, coolant leaks, and measures wear metals
- Proactively maintain your equipment
- Maximize availability and performance
- Can identify potential problems before they lead to major repairs
- Reduce life cycle cost by extending component life

\* Certain exclusions and limitations apply. Refer to the customer certificate for complete program details and eligibility. Komatsu® and Komatsu Care® are registered trademarks of Komatsu Ltd. Copyright 2019 Komatsu America Corp.

# KOMTRAX EQUIPMENT MONITORING

- KOMTRAX is Komatsu's remote equipment monitoring and management system
- KOMTRAX continuously monitors and records machine health and operational data
- Information such as fuel consumption, utilization, and a detailed history lowering owning and operating cost

 KOMTRAX is standard equipment on all Komatsu construction products

- Knowing when machines are running or idling can help improve fleet utilization
- Detailed movement records ensure you know when and where your equipment is moved
- Up to date records allow you to know when maintenance is due and help you plan for future maintenance needs

KOMATSU

- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone
- Automatic alerts keep fleet managers up to date on the latest machine notifications

- Knowledge is power make informed decisions to manage your fleet better
- Knowing your idle time and fuel consumption will help maximize your machine efficiency
- Take control of your equipment
  - any time, anywhere

\*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

# STANDARD EQUIPMENT

#### ENGINE

- Automatic engine warm-up system
- Dry type air cleaner, double element
- Engine, Komatsu SAA6D107E-3
- Engine overheat prevention system
- Fuel pre-filter (With water separator)

# ELECTRICAL SYSTEM

- Alternator, 21 V/85 A
- Auto-decelerator
- Batteries, large capacity
- Converter, 12 V
- Electric horn
- Starting motor, 24 V/5.5 kW
- · Working light, 3 (Boom and cab)

### HYDRAULIC SYSTEM

- Arm holding valve
- Boom holding valve
- Pattern change valve (ISO to BH)Pressure Proportional Control (PPC)
- hydraulic control system
- Power maximizing system
- Service valve (1 additional)
- Three Speed travel with auto shiftWorking mode selection system

### ∖\* <mark>ﷺ Optional equipment</mark>

### HYDRAULIC SYSTEM

- Hydraulic control unit —One additional actuator
- Proportional control handles

### **GUARDS AND COVERS**

- Cab guards
  - -Full front guard, OPG level 1 (ISO 10262)
