Are you ready to visualize your whole site in 3D?

Smart Construction
Design

Ready to make the leap from 2D to 3D?

Save time and eliminate the headache of converting paper plans. Now you can quickly move from rolled-up paper plans to a digital design file with Komatsu's 3D data generation service: Accurate data that is easily shared, replicated and updated.

A foundation for the modern job site

Accurate 3D models allow for improved visualization of the project in multidimensional form and is easily shared and updated as work progresses.

Free up staff time

Strategically delegate work and flex your operations. Outsourcing tasks like 3D modeling ensures that your current team focuses on core business operations, while taking care of job site requirements.

Transform your job sites

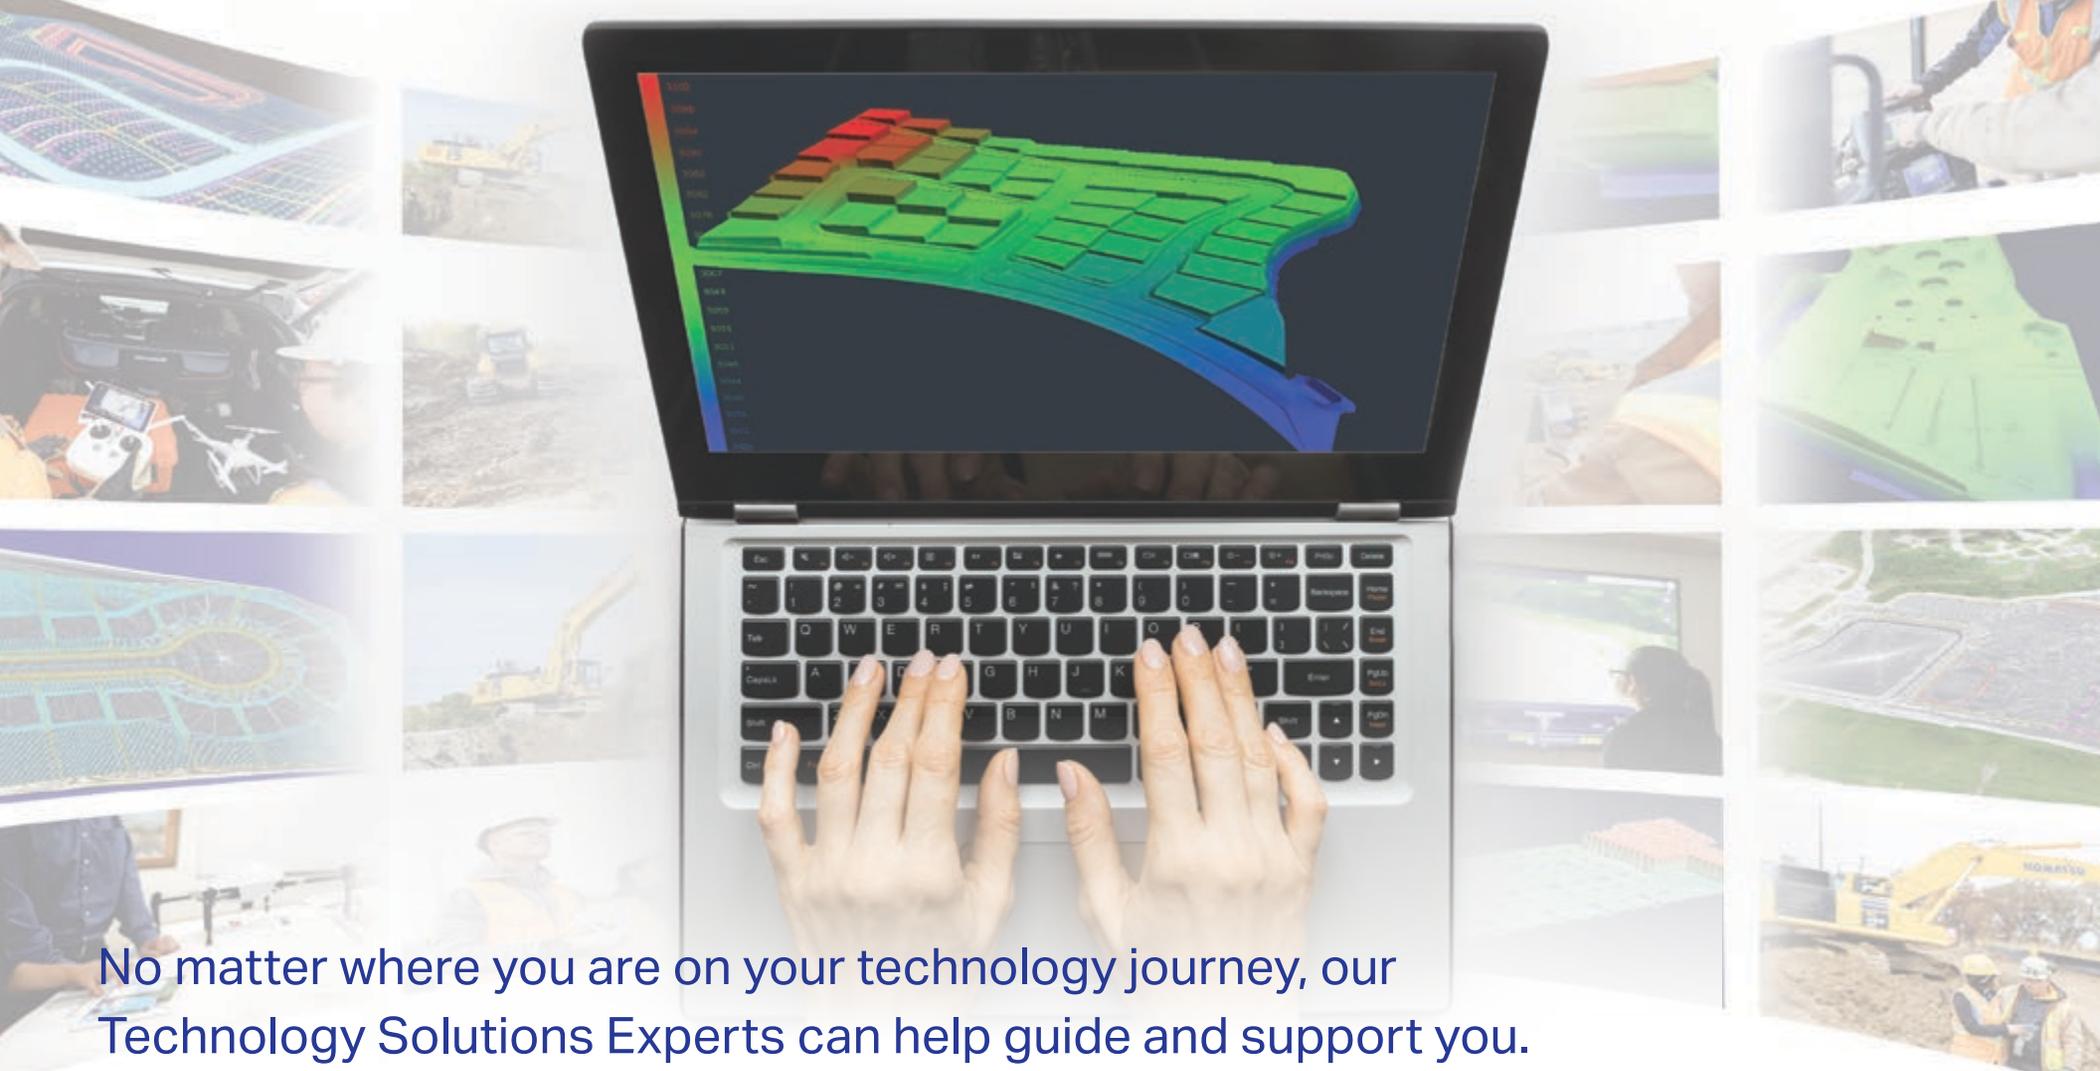

When you're moving thousands of tons of earth, you need to know the data you have is correct and can be depended upon, so you only move earth more efficiently.

3D data optimized for machines and applications

Design files are compatible with Komatsu intelligent Machine Control models, as well as aftermarket grade control systems. Attention and detail at the start with the 3D model helps avoid issues later with the machines in the field.

No matter where you are on your technology journey, our Technology Solutions Experts can help guide and support you.
