

Delta Max crawler shoe

Electric rope shovel undercarriage

Designed for longer life and less maintenance

Targeting up to 20% life increase over the Standard Delta shoe.

The crawler shoe you have been asking for is here. Built on the proven legacy of the Standard Delta shoe, the Delta Max is designed to help extend the crawler shoe's life, reduce maintenance and provide the same reliable P&H quality you've come to trust.

Designed to increase shoe life and reduce operating expenses: The solid roller path is unique to P&H and has been built upon our proven legacy product. Unlike a hollow core, the filled core is designed to increase shoe life by increasing the resistance to crush.

Help lower total cost of ownership with extended system life: The one-inch raised roller path is designed to extend system life as your shovel starts at a higher clearance. This feature also reduces the need to trim your drive lugs later in the shoe's life, which results in less maintenance and downtime.

Engineered to limit maintenance costs with reduced pin breakages: The increased pin size is up to 35% stronger than standard pins. The increase in strength helps in the reduction of pin breakages.
