

## HRX sizer segment

### **Durably designed to minimize disruption and optimize your mine's performance**

Komatsu's HRX sizer segments are engineered for reliable material reduction and feature a bolt-on design that eliminates the need for welding, helping to reduce maintenance downtime and enhance safety. Built for harsh mining conditions, these segments can help deliver consistent performance and durability shift after shift.

- Quick and easy to replace
- Designed to enhance safety
- Durable and reliable
- Helps lower maintenance costs

When your operation demands dependable performance from your processing equipment.

# Streamlined sizing solutions with Komatsu's HRX sizer segments

Dependable processing equipment can make a difference in maximizing your mine's operational efficiency and driving success in a demanding market. Komatsu's HRX sizer segments provide durability and easy maintenance to help minimize downtime for an optimized performance that provides a competitive edge.

## Easy installation, smooth operation

These segments feature a bolt-on design that eliminates the need for complex welding procedures, helping to make it easier and faster to replace worn or damaged segments.

## Focus on safety

Without the traditional and potentially hazardous process of welding, these unique segments help contribute to a safer work environment for your mining personnel.

## Equipment built to endure

These sizer segments are designed for durability, helping to ensure reliable and consistent performance, even in the most demanding mining environments.

## Spend more time processing

Swiftly swap out your segments to help minimize downtime and lower maintenance costs, keeping your equipment up and running longer.

## Deeper impact

Designed for durability and efficiency, HRX segments can help extend lifespan, reduce waste and promote a more sustainable mining operation.
