

Easily shared equipment planning and dispatch

Whiteboards have long been used to coordinate equipment across jobs and sites. Smart Construction Whiteboard brings that familiar experience into a digital platform — providing access from virtually anywhere, enhancing visibility across days, weeks or months and helping teams collaborate quickly.

Smart Construction Whiteboard is designed as an intuitive fleet management solution where you assign machines and assets to job sites with simple drag-and-drop functionality. From a few days out to years ahead, teams can view schedules and equipment status in real time from virtually any connected device, helping control downtime and boost productivity.

Key Features:

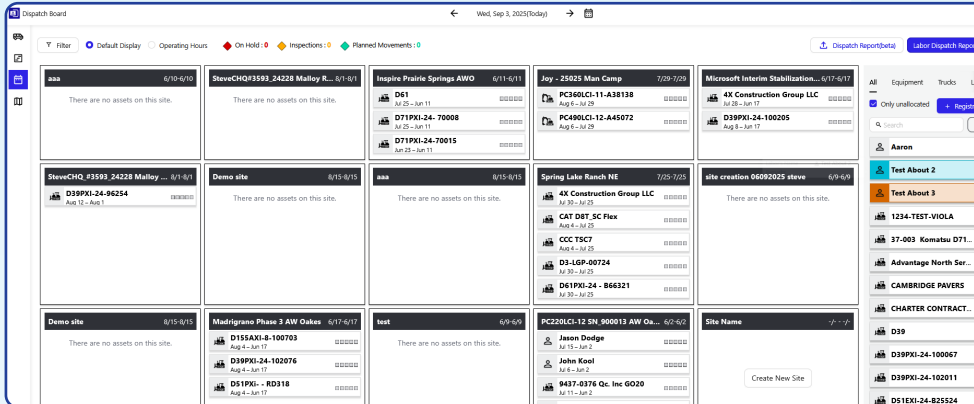

- Easy-to-use drag-and-drop interface for assigning assets
- Manage machines, trucks, attachments and personnel
- Group equipment and/or personnel for faster bulk scheduling
- View machine location and operating hours via Smart Construction Remote
- Schedule even years in advance

Benefit:

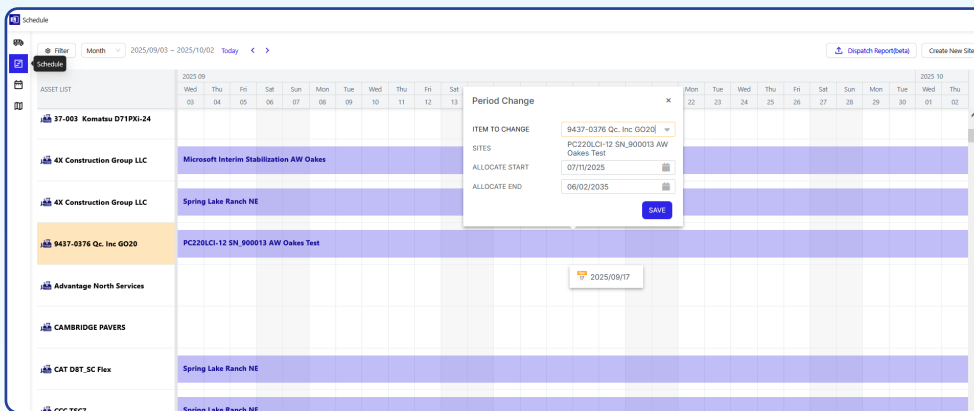

Smart Construction Whiteboard is designed to control unscheduled transport costs, enhance site utilization, better control emergency expenses and overtime – helping you save time and money across the board.

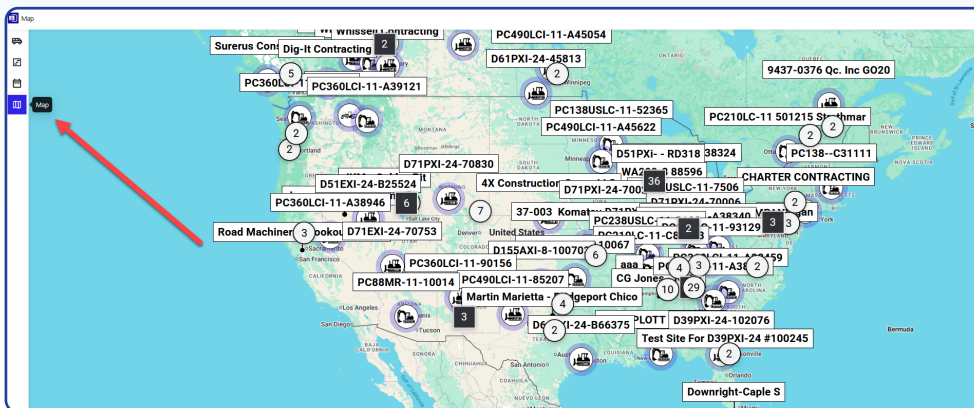

Smart Construction Whiteboard

Smart Construction Whiteboard looks like an actual whiteboard. To assign machines or workers to job sites, just drag and drop them from the column on the right, or from site to site.

Schedule view enables you to see where each asset is scheduled over extended time periods, making it easy to see and resolve overlapping schedules and assignments.

See at a glance where your machines are deployed in map view.

No matter where you are on your technology journey, our Technology Solutions Experts are ready to guide and support you in the adoption and use of Smart Construction.
