

KOMATSU

Fast, on site processing of drone data

The Smart Construction Edge device accelerates your drone data processing with a seamless workflow between your drone and Smart Construction Dashboard, so you can analyze 3D site renderings sooner. It also functions as a site correction base station.

Features:

- Seamless integration between drone and Smart Construction Dashboard Cloud SfM processing
- On board data processing, if needed. Its processing power and cellular capability* means you can likely use your data the same day
- Base station RTK correction streaming via network and external radio
- Simple set-up — no need to set ground control points on sites up to 50 acres

*requires cellular plan, free for first three years

**Smart Construction
Edge**

No matter where you are on your technology journey, our Technology Solutions Experts are ready to guide and support you in adoption and use of Smart Construction tools.
