How does the Gaming Challenge work?

1. Participants must first fill in the [Komatsu F1 Gaming Challenge registration form](#).
2. Once a race event window is open, participants will have a time frame to set the fastest lap possible on the designated circuit. Participants must use the Williams car within either the F1 24 or F1 25 game.
3. Participants can then share the details and a screenshot of their fastest time via the [lap time submission form](#).
4. Once the event window closes a final leaderboard is created and all winners are contacted.
5. If a participant is successful in finishing within the top three of that event, they will win a prize and be put through to the final.
6. The final will run in the same format as each event, but with even bigger prizes to be won.

Throughout the Komatsu F1 Gaming Challenge, there will be prizes on offer to all participants.

Prizes will be awarded for performance, but also through lucky draws, giving everyone the chance to win, whatever their ability level.

Prizes will be awarded as follows:

- Top three participants who achieve the fastest laps at each in-season round
- To five lucky draw winners at each in-season round
