KOMATSU

Agnostic fleet & material tracking solution

Automated production in real time

Load counting and production made easy

Smart Construction Fleet

Fleet and material management solution

A low cost dynamic Management System that shares and manages information on the positions of all your equipment. The application is easy and simple. IT provides various functions such as a real-time viewer (on a dashboard), load counting and location of different materials on and off site, machine approach notification function for machinery operators, alert functions for drivers, display of work history or traveling history, and links to iOS or Android devices, or our Smart Construciton Fleet Device.

Applications:
Smart Construction Fleet

Production & Progress

Our platform allows you to monitor the progress of individual tasks, track the performance of your equipment and personnel, and identify any potential delays or bottlenecks. This enables you to make adjustments and improvements to your operations, minimising downtime and increasing productivity

Real-time asset tracking

Monitor the location and status of your equipment and vehicles in real-time, using GPS tracking technologies.

Automated Counting

Rely on the system to track all of your material movement by automatically counting each load and dump.

Safety and compliance

Monitor compliance with safety regulations like Chain of Responsibilities, track safety incidents, and implement corrective actions to improve safety.

Analytics and reporting

Analyse your fleet's performance, identify trends, andgenerate reports to inform decision-making. You can also view Retro Fit Kit Payload results here.

Mixed Fleet

Smart Construction Fleet also supports mixed fleets, allowing you to manage all your equipment and vehicles from different manufacturers.

No matter where you are on your technology journey, our Technology Advisors can help guide and support you.
