Genuine parts

Why genuine parts?

Maintain functionality, extend life, and minimise downtime with top-of-the-line service products and consumables that meet increasing industry demands.

Komatsu genuine parts are fully covered by warranty and meet original factory specs, making it the best option to deliver a longer component life. At our parts distribution centres, we stock a complete range of parts including undercarriage, GET, oils, filters, lubricants, pump assemblies, bearings, hoses, and more.

Lubricants

Genuine Komatsu oils and lubricants incorporate a specially formulated additive package which is combined with the highest quality base oil.

Designed to ensure you get the best performance from your machine, they include engine, transmission and hydraulic oils as well as greases and lubricants for undercarriages, working implements (booms, arms, buckets and blades) and other moving parts.

Used in conjunction with our oil analysis service, Komatsu oils and lubricants maximise component life.

Different oils require different specifications:

*Engine oil

- Anti-wear performance
- High dispersancy
- Superior detergency
- High thermal stability

*Hydraulic oil

- High oxidation stability
- Abrasion resistance
- Optimal viscosity

*Powertrain oil

- Anti-wear performance
- Anti-seizure performance
- Heat resistant
- Friction resistant

Grease

- Anti-wear performance
- Improves bearing life
- Improves equipment life
- Extreme pressure performance

Coolants

- Powerful resistance to corrosion and rust
- Prevents cavitation
- Prevents scale clogging
- Enhanced with highly heat resistant
- Long-life additives

*Axle oil

- Anti-squawk performance
- Anti-scuffing performance
- Heat resistant
- Friction stability

**Komatsu patented lubricants are perfectly balanced to maximise component life and performance.*

Ground Engaging Tools (GET)

Ground Engaging Tools (GET) are a critical element in successful excavating and earthmoving, whether you are digging, loading, pushing or ripping: from the smallest utility machine to the largest mining equipment.

Suitable for both Komatsu and other products, our ground engaging tools are designed for excavators, loaders, dozers and graders and include teeth, bolt-on edges, end bits and ripper boots.

We are also the exclusive supplier of industry-leading K VX and Hensley systems, enabling operators to select the most appropriate and cost-effective solution for their application.

Our new E-series GET product line delivers performance at a competitive price, with the reliability, durability, and innovation you expect from Hensley engineering.

Filters

Air cleaner and filters play a vital role in your machine's performance.

No matter how good the machine, it cannot perform well when it is used in a dusty environment without high-quality filters, with unclean oil, or with fuel contaminated with dirt or water. The Komatsu air cleaner and filters remove dirt, dust, wear particles and other items that could potentially impact the overall performance of your Komatsu machine.

Superior quality Komatsu genuine filters are designed and manufactured especially for Komatsu machines for absolute efficiency in high-pressure applications.

Engine oil filter

Removes dirt and moisture to enable oil to lubricate, clean, cool and seal moving engine parts.

Fuel filter

Removes dirt and moisture in the fuel before fuel enters the injection pump and injection nozzles.

Air filter

Prevents dust from entering while providing clean air to the engine.

Hydraulic filter

Removes metal contaminants caused by wear of sliding parts in hydraulic circuit of machine.

Air-conditioning filter

Keeps dust from entering machine cab, providing fresh air for operator.

Genuine parts

Services and support

At Komatsu, we believe product support is a crucial value-added service to ensure the cost effectiveness and productivity of your equipment. Engage one of our many branches nationwide for machine inspections, undercarriage assessments or more information on remote equipment monitoring tools such as Komtrax and Komatsu Fleet Management applications.

Remanufacturing (Reman)

Komatsu Reman gives your equipment a second life, without compromise. Genuine Komatsu components are expertly remanufactured at our world-class facility at the Komatsu Campus in Johannesburg, then tested to deliver the dependable performance you expect from new.

With the **same warranty as a new component**, flexible exchange and repair options, and a clear, proven process, Reman makes it easy to restore performance, manage costs and keep your operation moving.
