

Working smarter in every way

Benefits of iMC 2.0

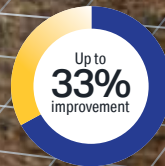

Save money

Frees GPS Dozer from need to achieve final grade so it can work elsewhere on the site.

Save time

Reduce staking, grading and inspection with 3D design data and semi-automatic grading.

Improve accuracy

Continuously monitor grade and semi-automatics to dig precisely to grade.

Less time grade checking

Monitor performance and stay on grade from the cab: operators spend time working, not grade checking.

Reduce base aggregate

Greatly reduce over-digging and the amount of costly base aggregate needed for applications like utilities.

Contact your local distributor for more information!

**All savings, improvements, and reductions are compared to traditional grading methods.*
