

RemoteSense live work reduction kit

Assess bearing wear, hydraulic performance and locate leaks — all from a comfortable distance.

Reduce live work while enhancing your diagnostic efficiency

Protecting your mining personnel is job number one. With Komatsu's RemoteSense kit, you get wireless monitoring tools that enable your technicians to perform routine machine diagnostics remotely. This kit is designed to help:

- Reduce exposure
- Prioritize safety
- Enhance diagnostic efficiency

The kit includes a 360-degree camera that offers a comprehensive view of your machine so your personnel can identify issues in hard-to-reach areas while staying out of hazard exposure zones. The kit also includes:

- Wireless multitool with user-friendly touchscreen
- Wireless pressure transducer
- Wireless dial indicator and mount
- Camera accessories
- Charging case (case/foam/power supply)

Remote diagnostics for peak machine performance

The Komatsu RemoteSense kit features innovative technology that is designed to reduce potential harm while ensuring your machines operate optimally.

Drive to zero harm

Engineered to eliminate the need to physically access potentially hazardous areas around machinery to perform routine diagnostics, reducing exposure.

Maximized uptime

Identify and address minor issues before they escalate into major problems, helping to mitigate time spent on equipment breakdowns and maximizing machine availability.

Enhanced efficiency

Streamlines the service processes, allowing your technicians to perform checks and gather data quickly and efficiently.

Data-driven decisions

Provides data on machine health so your technicians can make informed decisions about repairs and maintenance without relying solely on visual inspections.

Reduced costs

The kit is designed to help minimize machine downtime, mitigate breakdowns, optimize the service processes and reduce overall maintenance costs.
