

HX20

Underground mining truck

The perfect partner
for the WX07 LHD

Built to last. Engineered to perform. Designed to exceed expectations.

The efficiency and reliability of your haul trucks is crucial for the overall productivity of your underground mining operation. Komatsu's HX20 is a dependable and durable narrow vein and mid-seam mass mining truck that's designed to handle harsh underground conditions so you can help maximize your output and minimize downtime.

- Simple and robust design that's built to last
- Easy and cost-effective to maintain
- Delivers exceptional performance
- Oscillating articulation for a smooth, comfortable ride

Quick specs

- **Volume, nominal heaped:** 9.8-16.3 yd³ (7.5-12.5 m³)
- **Payload capacity:** 44,000 lbs. (20,000 kg)
- **Height, laden (at cabin):** 101 in. (2,555 mm)

When your operation demands dependable performance from your underground trucks, choose Komatsu's HX20 to deliver the results you need to succeed. Check out the back page to learn more about this 20-metric-ton workhorse.

Durable. Dependable. Delivers results.

With its simple yet rugged construction, advanced features and focus on safety and efficiency, the HX20 offers a powerful solution for mining companies seeking to optimize their productivity and minimize costs.

Rugged and reliable

Engineered with longevity in mind, the HX20's simple and robust design works to minimize maintenance requirements, helping reduce downtime and operating expenses.

Designed for comfort and safety

The HX20 offers a ROPS/FOPS certified cab together with oscillating articulation which reduces operator fatigue and increases comfort, along with intuitive controls and emergency stop buttons to help prioritize operator safety.

Performance that drives productivity

With customizable dump bowls, compact design and excellent maneuverability, the HX20 is built to enhance your operation's productivity, streamline maintenance and cut costs.

Ease of maintenance

Ground-level access and centralized service points make maintenance straightforward and simple, helping to minimize downtime and improve efficiency.

Technology-ready

For access to data insights, this machine can be equipped with an optional data logging system and digital analytics solution with a level 9 proximity detection interface.
